

# HOOK v BULLET

THERE ARE TWO OPTIONS WHEN CHOOSING THE SUSPENSION RAILS FOR YOUR DOOR KIT, BUT WHICH IS BEST SUITED TO YOUR APPLICATION & WHAT IS THE DIFFERENCE?

## HOOKTYPE

Our hook type rails are part of our standard range. Made of stainless steel, the rails are ideal for industrial applications where the suspension needs to be strong and able to withstand heavy duty use.

### BENEFITS

- Easy to install
- Easy to unhook when replacing & removing
- Suitable for large & small installations
- Strong and durable
- Energy Saving
- Fully interchangeable with PVC range

### COMMON APPLICATIONS

- Industrial applications
- Warehouses
- Commercial kitchens
- Cold Stores

## BULLETTYPE

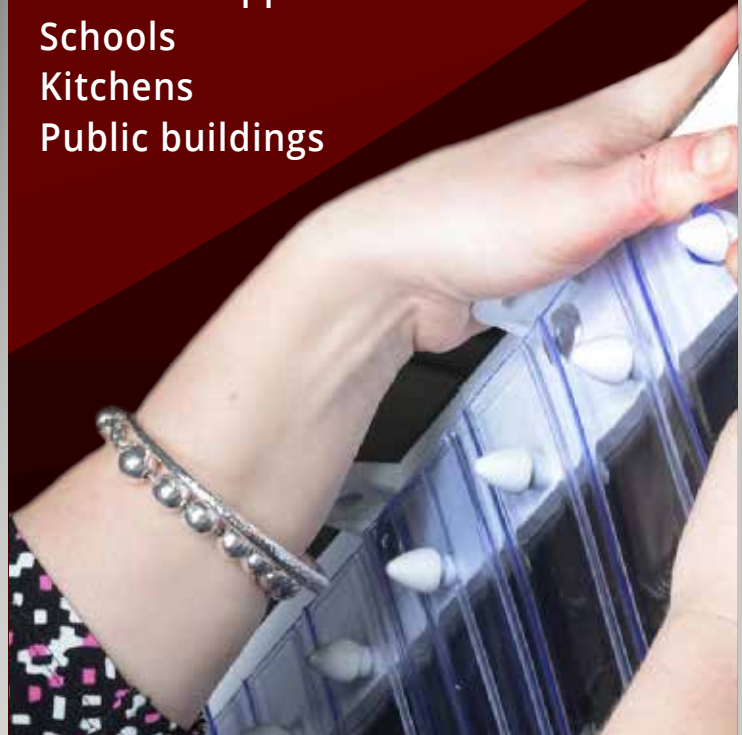

The bullet suspension rail is part of our premium range. Ideal for public environments where safety is the primary concern. The bullet rail is 10% more expensive than our standard range due to the quality and moulded profiles.

### BENEFITS

- Easy to install
- Easy to clean
- Aesthetically pleasing
- Improved security due to bullet shape locking the PVC onto the rail
- Designed for safety
- Energy saving

### COMMON APPLICATIONS

- Domestic applications
- Schools
- Kitchens
- Public buildings
