

In order to support your PVC strip curtain, you will require a robust suspension system and hardware. All our suspension systems have been tested and approved for use, we offer hook type, bullet, heavy duty and sliding track suspension systems for PVC strip curtains.

HOOK TYPE: INDUSTRIAL USE

Used in all industrial environments, our hook type system is our most commonly used for mounting PVC strip curtains. Our hook type suspension system is the most economical system we supply and ideal for all industrial environments. We offer the rail in stainless steel and heavy-duty galvanised for larger openings that withstand large amounts of traffic. Our range includes a variety of thicknesses:

1.2 MM - 430 SS

1.5 MM - 430 SS

3MM - HD

BULLET RAIL: COMMERCIAL/DOMESTIC

Our white plastic bullet rail is the easiest and safest suspension system in our range. The rail is lightweight and has no sharp edges, ensuring worker and pedestrian safety when passing through. The design of the bullets allows for easy installation and removal/replacement when necessary.

SLIDING TRACK

PVC strip curtains can be moved out of the way by installing them on a sliding system, our sliding track means the PVC curtain will slide seamlessly on a robust track with runners, extending the life of your PVC curtain and ensuring it can move with ultimate ease.

Sliding track systems can create:

- Single sliding systems
- Bi-parting systems
- Double track options
