

Rayflex – Recycle – Reuse

- **Rayflex** - has a new sustainability initiative designed to help reduce our impact on the planet. We are actively reducing the amount of waste PVC that goes to landfill.
- **Recycle** – we can end of life your old PVC strip curtains and PVC products. All our own PVC waste and your PVC waste will now be sent to our trusted recycling partner where it will be re-compounded and re-granulated.
- **Reuse** – Your used PVC strip curtain can then start its' life again as plastic hoses, packaging materials and even furniture. Ensuring wherever possible we limit the production of virgin PVC material.
- **Replant** – we donate £100 per Tonne of waste to the Woodland Trust. £100 of cared for Woodland helps to store around 4 tonnes of carbon.

Rayflex – Recycle - Reuse

How to join our initiative:

- **Return** – simply collect all your flexible PVC waste from your own / your customers sites and store ready to return in small or large batches. Remove all metal fittings (we can only accept PVC). You do not need to split colours, grades we do that for you.
- **Remind** – email us and let us know that your package is on its' way. Make sure the subject line reads "Recycle My PVC" along with your name and company and weight of the PVC to be returned if possible.
- **Receipt** – we will let you know that we have received your returned PVC ready for recycling and will advise on how much PVC waste you have removed from landfill.
- **Reward** – we will send your reward certificate stating how much carbon you've helped to store in line with our care and replant initiative with the Woodland Trust.

Rayflex – Recycle - Reuse

PVC Recycling - Carbon Reward Certificate:

Company Name:	
PVC Weight Returned:	
Rayflex £ Donation:	
Captured & Stored Carbon:	

Capturing and storing carbon from the atmosphere is vital in the fight against climate change.

**Every £100 donated will help the Woodland Trust care for enough woodland to capture and store around four tonnes of carbon.*
